Safety Precaution during Diving Operation

The Master, Chief Engineer or Chief Officer shall inform the Dive Supervisor before the commencement of diving operations of the following activities:

1. Vessel secured at anchor/moored alongside the berth.
2. The International Code of Signals "Flag A" hoisted from the vessel and dive Boat if used.
3. Port of Fujairah Control Tower will be informed before starting and on completion of the Diving Operation.
4. Rudder and Propellor will be Isolated.
5. Main engine(s), turning gear, bow thrusters, propellers and steering gear are locked out and tagged out correctly in accordance with the vessels Safety Management System.
6. All underwater electrical devices including the Cathodic protection system, Sonar, Doppler log and Echo sounder isolations are made and confirmed prior to commencement and on completion of diving.
7. All sea intakes and discharge overboard valves are secured with double valve protection and locked out/tagged out.
8. Ballasting/De ballasting operations suspended.
9. Job requirements will discuss with the dive supervisor.
10. Environmental conditions (Weather Forecast/Visibility & Tide) information will be provided to dive supervisor.
11. All Vessels in the vicinity will be informed.
12. Working channel will be established with the dive supervisor.
13. Lookout watch will be posted.
14. All applicable emergency tools, materials, and equipment will be checked and be ready for use
15. "Divers at Work" notification as provided by the Dive Supervisor, must be displayed in the Cargo control room, Bridge and the Engine control room and gangway area.
16. If the bunkering operation is planned concurrently with the diving operation, the Dive Supervisor must be informed

Master Declaration

I undersigned Master of the Vessel shall hereby declare that the above-mentioned safety precautions will strictly adhere to during diving operations and that the Port of Fujairah rules/regulations will comply.
